Handball at School

Dear President,

As you may know I presented the four-year activity plan during the last electoral Congress. One of the goals has been to increase the popularity of handball and to attract even more athletes to handball. An important aspect in this context is the position of handball as part of physical education at school and corresponding institutions, such as universities, in the different countries. The International Handball Federation is currently developing various concepts in order to make handball at school even more attractive, e.g. by offering special training measures for teachers of physical education or elaborating teaching material and concepts for different age categories.

In order to learn about the situation in your country you are kindly requested to fill in the attached questionnaire to be returned to the IHF Head Office no later than ... May we respectfully ask you to also submit your concepts and ideas (brochures, examples for training, etc) in order to be included in our programme.

Looking forward to hearing from you I remain

Yours sincerely,

INTERNATIONAL HANDBALL FEDERATION

A handwritten signature in black ink, appearing to read 'H. Moustafa', is placed below the typed name of the President.
